

Broening Highway Project

Description: Broening Highway is receiving a reconstruction of the roadway (from Keith Ave to the terminals), which includes new curbs, gutters, drainage, electrical, water mains and street lights. When finished, the road improvements are expected to result in a smoother riding surface. The following are activities that will be taking place over the next three to four weeks.

Broening Highway Update

As of 5/12/2015

South of Keith Avenue:

- Water main service tie-in work
- Roadway and driveway construction southbound side of Broening
- Light and signal pole foundation installation.

North of Keith Avenue:

- Street light and signal conduit installation
- Signal and street light pole concrete base installation
- New concrete railing installation
- Water main tie-in at northern limits (at Amazon Facility)
- Remaining concrete roadway construction (under CSX Bridge).

Expected completion October 2015
